

G3 CREASING RING UPGRADE FOR MHI EVOL

Sauer System is pleased to offer all EVOL plants a risk-free G3 scorer trial for their EVOL 84 and EVOL 100 machines, aimed at improving all aspects of scoring and folding, including:

- Reducing rolling scores
- Reducing liner fracturing
- Reducing fishtail and plowing
- Improving gap variation consistency
- Improving box squareness
- Producing a crisp, well-defined center and glue tab score

Information regarding the EVOL G3 trial

- 1) We recently completed four successful trials (three on EVOL 84 machines and one on a newer EVOL 100 machine). The G3 male and female scorers dramatically improved scoring and folding. In all cases, both the operators and plant management were pleased with the results.
- 2) All scorers are sold on a trial basis. If they do not perform as expected, box them up and return them for a full refund. We are so confident the G3 solution will bring improvement, we are willing to make this offer in good faith.
- 3) As part of the trial, a Sauer technician can be present during start-up to ensure everything is working correctly and make touch screen adjustments. Once the ideal pressure settings are worked out, we will document these settings so they can be kept on file future use.

Crisp, well-defined glue tab score

Please call us at **1-800-444-8458** for further information or to set up a trial.
